Souvenir Zafindrajaona P., 239
Stamenković-Radak M., 91
Strandén I., 25

Talmant A., 61, 149
Terzić T., 91
Teyssier J., 77
Thimonier J., 77
Thiriot-Qiévreux C., 519
Toro M., 255

Villanueva B., 115
Vukasinovic N., 319

Woolliams J.A., 43, 115, 193

Keyword index vol. 31

5S rRNA gene, 509

accuracy, 163
Africa, 239
amylase, 91
animal model, 105
animal model BLUP, 135
average coancestry, 255

base population, 105
Bayesian inference, 25
Bayesian network, 3
binary traits, 177
blocking, 3
BLUP selection, 115
Bos indicus, 239
Bos taurus, 239
breeding values, 421
breeding value estimation, 375

carcass composition, 149
Cerastoderma edule, 509
Charolais and Limousin breeds, 465
chromosome, 519
conditional inverse Wishart distribution, 177
connectedness, 163
conservation genetics, 255
Crassostrea angulata, 519
Crassostrea gigas, 519
Crassostrea virginica, 519

dairy cattle, 163
dairy production, 529
Dirichlet, 457
DNA markers, 375
dominance, 421
dominance variance, 43
Drosophila, 91

estimation, 457
evolvability, 491

finite locus model, 193
FISH, 509

Gaussian approximation, 225
G-banding, 519
gene effect distribution, 193
gene mapping, 351
generalized linear mixed models, 301
genes, 263
genetic distance, 457
genetic evaluation, 135, 163
genetic marker, 437
genetic parameter, 77, 465, 529
genetic polymorphism, 239
Gibbs sampling, 3, 25, 177, 193
glycolytic potential, 61
goat, 529
graph theory, 3
growth temperature, 491

half-sib design, 437
half-sib family, 225, 341
heterogeneity of variances, 301
heteroskedastic model, 341
hierarchial design, 351

inbreeding depression, 43
infinitesimal model, 193
interval mapping, 319

linkage disequilibrium, 341
live and carcass traits, 465
log-likelihood ratio test, 225

major gene, 115

marker assisted selection, 375, 421
maximum likelihood, 213
meat quality, 61
milk proteins, 239
mixed effects models, 25
mixed inheritance model, 3
mixed model equations, 105
molecular markers, 255
muscle, 61
muscle glycolytic potential, 149
nomenclature, 263
non-transcribed spacer, 509

optimal selection, 115
ovulation, 77

phenotype plasticity, 491
pig, 61, 149, 351
polymorphisms, 91
power, 183
precision, 457
progeny test, 163
protocol design, 183

QTL, 183, 319
QTL detection, 213, 225, 341
QTL mapping, 437
quantitative trait loci, 375, 421
quantitative trait locus, 351
quasi-score, 301

random model, 319
realized heritability, 135
reproduction, 77
reproductive traits, 149
residual covariance matrix, 177

restricted inbreeding, 115
restricted maximum likelihood, 43
robust estimation, 25
ruminants, 263

seasonality, 77
selection, 105, 465
selection experiment, 61, 135, 149
sheep, 43, 77
sib-pair method, 319
simulation, 183
specific activity of the enzymes, 91
statistical power, 351
Student's t-distribution, 25

threshold response model, 301
tissue-specific expressions, 91

unknown linkage phase, 225

variance components, 43

wing and thorax length, 491
wing/thorax ratio, 491
